Features and Benefits

Robust Geko Design

Designed and manufactured by Geko Engineering in the UK. 30 years of experience ensures maximum durability.

Versatile Stand

Stand holds the grinder upright for changing teeth, easy storage and attaching to your digger with ease every time.

Low Vibration

Compared to a walk-behind stump grinder, the Stump Beaver has low vibration, which means low operator fatigue.

Safety Guard

Fully guarded to ensure safety for the operator and bystanders.

Low Maintenance

No engine, belts or tyres to service. Low maintenance means you save time and money.

Grind Deeper

Perfect attachment for re-surfacing and re-seeding as there is no depth restriction.
